

Course Information Sheet

(MSc)

International Project Management

Mode and course length – Full-Time (1 year) Part-time (2 years)

Location – ARU London Campus (East India Dock)

Awarding Body – Anglia Ruskin University. As a registered Higher Education provider Anglia Ruskin University is regulated by the Office for Students.

a.r.u. | **London**

Overview

The MSc International Project Management course is designed for students with significant work experience and provides a deep understanding of project management across different contexts and organisations. It emphasizes theory-informed practice and critical analysis of current and future trends, preparing students for careers in diverse sectors or for further academic research in project management

Course Delivery

Our courses are delivered through teaching and learning methods that provide students with the broadest possible exposure to a modern and innovative higher education experience. These methods may vary and could include attendance at lectures and seminars, undertaking laboratory exercises or work-based activities, practical work, performances, presentations, field trips, other relevant visits, and e-learning through the VLE, our online learning management system.

Each course is divided into a number of 'modules', each focusing on specific areas and employing a distinct approach to its delivery. This information is made available to students for each module they undertake via the Module Definition Form (MDF) and the VLE.

Assessment

Knowledge and understanding are assessed through various methods, including presentations and a range of assignments. These assignments may take different forms, such as a written management report on responding to an organisational issue, a presentation, an essay, a briefing document, or an analysis of a company report. Most modules will include at least two assessments, offering the opportunity to evaluate both knowledge and understanding as well as a range of skills effectively.

Formative assessment will also be provided throughout the course. This feedback will help improve students' knowledge and development and allow for the evaluation of their academic needs.

Fees

Information about your course fee, including any annual fee increases or deposits (if required), can be found in your offer letter.

Additional Costs

During your course, you may be required to take extra or repeated modules to recover any modules you have failed. If you started your course on or after September 2019 and this extends your course end date beyond the original date stated in your offer letter, you will be charged an additional tuition fee to cover the costs of the extra or repeat modules. This additional fee will be based on the credits for the module(s) you repeat or take.

Modules

Core Modules

MOD009372 Postgraduate Study Skills, Research Methods and Ethics

This module helps students develop academic skills for postgraduate study by focusing on empirical and conceptual research methods, ethical considerations, and academic writing. It covers research methodologies, data handling, and ethical issues, while also providing guidance on career development and enhancing critical thinking and argumentation skills.

MOD009379 Principles of International Project Management

This module introduces students to the theory and practical tools needed to manage projects in an international business context. It covers key areas such as project initiation, stakeholder management, governance, and sustainability, while addressing differences in methodologies across sectors and global regions.

MOD009375 Cross-Cultural Leadership and Human Capital Management

This module equips students with the skills to manage diverse international teams, focusing on both functional management and leadership motivation. It explores global workforce models, employment laws, and ethical challenges, while emphasizing the importance of building high-performing, resilient teams.

MOD009380 International Project Management Execution

This module builds on the basics of International Project Management, preparing students to manage projects effectively in any industry or country. It covers essential skills such as budgeting, risk management, and project evaluation, equipping students for successful careers in business and project management.

MOD011077 Project Logistics and Delivery Management

This module is designed to enable students to gain a critical appreciation of the logistics and how logistics impacts successful delivery of projects. The module is delivered from a constructivist approach, using active inquiry-based learning and problem-based learning approaches and strategies, with real-life examples to enable students to debate, critique and reflect on the confluence of project logistics management and project delivery management and the level of project success.

MOD009393 Postgraduate Integrative Project

This module guides students through the process of preparing and submitting an MBA level research dissertation or consultancy project. Students will produce an 8,000-word dissertation or project report, demonstrating academic mastery, research skills, and practical application of theoretical concepts, with support from a supervisor and adherence to ethical and intellectual property guidelines.
